

2015 HIGHLIGHTS of the 2015 Guidelines Update for CPR and ECC - Heart and Stroke Foundation of Canada Edition (PDF)

eBook Heart and Stroke Product Number RE9600ED

Print Page Number	Location	Original Text	Change	When Change Was Identified	When Change Was Made	Notes on Change
5	Footnote referencing Naloxone	** In Canada, Naloxone is a Prescription Only Medicine (POM) listed on Health Canada's Prescription Drug List. Naloxone can only be dispensed with a prescription. Legally, a prescribed drug may only be administered to the person named on the prescription, not a third party.	In early 2016 Health Canada announced a change to the prescription status for Naloxone that would allow non-prescription use outside of hospitals, setting the stage for province and professional bodies to amend legislation and regulations. Depending on your province, you may be able to obtain naloxone kits at pharmacies or from community health clinics or programs. Check with your provincial Ministry of Health, pharmacist or community health provider for more information.	5/26/2016	To be made in second release of eBook	Change notice posted on Heart and Stroke Resuscitation Portal and Heart Shop
